

## Archiving Documents easier in SAP Business One

Cologne, 17/02/2011

Time is an important factor in business. To streamline processes and to keep track of things is the supreme discipline in businesses. MARINGO Computers presents ELO for SAP Business One at CeBIT 2011, the new interface that simplifies document archiving and document search considerably thus avoiding extremely time-consuming document search.

ELO for SAP Business One, which is a cooperation of MARINGO Computers (Cologne) and busitec GmbH (Münster), allows for the automatic indexing and archiving of outgoing documents generated in SAP Business One in the ELO Enterprise Content Management System. Searching for documents is simplified by extensive search options. Documents are available at any time at the touch of a button and can thus be viewed or processed. In addition to outgoing documents, the new interface enables to provide incoming documents, emails or Office documents with keywords and to archive the documents following the legal requirements. In particular the easy and time-independent search function of ELO4 SAP Business One simplifies business processes considerably.

ELO for SAP Business One can be flexibly adapted to your individual business needs. Furthermore, the solution is suitable for businesses with global presence because it supports the use of multiple companies and multiple languages.

**MARINGO Computers** is a software development and consultancy firm located in Cologne (Germany).
