

Seamless communications rely on SAP Business One

German-based Sinus Nachrichtentechnik has always specialized in bringing innovative, powerful communications solutions to a wide range of public and private sector customers, including fire brigades, emergency services, municipal and federal law enforcement, industrial companies and transportation networks. When the company recently set out to future-proof its processes, they embraced SAP Business One along with expert implementation support from Maringo. Consequently, Sinus Nachrichtentechnik now enjoys streamlined administrative and financial processes, comprehensive process oversight and heightened data transparency and security, placing the company on solid technological footing for its fast-expanding customer-base.

“We wanted a system that reflected all our processes and **SAP Business One** delivered the **perfect solution**, ensuring we will be **well-positioned for the future.**”

Marcus Landschof, Director General, Sinus Nachrichtentechnik

Before: Challenges and Opportunities

- Facing increased demand from strong customer growth and an expanding workforce
- Aiming for greater data transparency and optimized process management
- Seeking a robust, reliable and secure ERP

Why SAP Business One and Maringo

- Solution provides a robust, integrated data management platform with full data transparency
- Solution provides the tools for comprehensive operations oversight and process management
- Partner deemed to be consistently responsive, fast and effective

After: Value-Driven Results

- Complete data transparency for better decision-making
- Comprehensive process mapping for enhanced oversight and monitoring
- Streamlined accounting, invoicing, ticketing and vehicle fleet management processes

40 years

of proven success in the communications sector
